

Metal Raw Materials Statistics table

Data table of copper usage in Dynamic raw materials in 2024

Project	Copper usage in raw materials (tons)	Amount of recycled copper used (tons)	Proportion of recycled copper
Substrate	4,292,003	3,675,822	85.64%
Copper foil	1,380,062	999,577	72.43%
Copper ball	3,112,393	3,112,393	100.00%
Total	8,784,458	7,787,792	88.65%

Data table of aluminum usage in Dynamic raw materials in 2024

Project	Aluminum usage in raw materials (tons)	Amount of recycled Aluminum used (tons)	Proportion of recycled Aluminum
aluminum sheet	599.4	0	0%
Single sided aluminum sheet	195.9	0	0%
Coated aluminum sheet	234.8	0	0%
Total	1030.1	0	0%

The aluminum sheets used by aluminum sheet suppliers do not contain recycled aluminum components. Aluminum sheet manufacturers generally purchase aluminum ingots from upstream aluminum ore plants and process them into aluminum sheets.

The aluminum scraps used by Dynamic are recycled by scrap manufacturers, then sold to furnace plants to be turned into aluminum ingots, and finally sold to customers with low impurity requirements (such as toothpaste outer packaging).

Nickel usage data table in Dynamic raw materials in 2024

Project	Nickel usage in raw materials (tons)	Amount of recycled Nickel used (tons)	Proportion of recycled Nickel
Sulfur-containing nickel round cake	0	0	0%

Nickel round cake supplier, nickel comes from nickel ore, no recycled nickel is used °
